DETAILED ACTION

Information Disclosure Statement

The IDS filed on 5/15/06 has been considered and placed of record. An initialed copy is attached herewith.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-18, 21-38 are rejected under 35 U.S.C. 102(b) as being anticipated by Peter et al. (US 5,592,067). The reference discloses a charge equalizer having, *inter alia*, a plurality of battery cells, a charge controller for distributing the charge among the cells through a non-dissipated load (phantom module) until a threshold target is reached. Converters are used to up-transfer or down-transfer the charges through a series of switching topologies.

Claim Rejections - 35 USC § 103

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of

the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 19, 20, 39 and 40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Peter et al. (US 5,592,067). The reference does not disclose a timer for tracking the charge and/or discharge time. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have provided a timed charge/discharge circuit, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Response to Arguments

Applicant's arguments filed 5/15/06 have been fully considered but they are not persuasive. With respect to Applicant's argument that the phantom module is not a

non-dissipated load, the Examiner disagrees. According to Applicant's definition of what is a non-dissipated load, the phantom load/module falls right into that definition. All the charges put in the phantom module are siphoned off whenever a transfer is necessary.

With respect to Applicant argument that Applicant deals with a state of charge balancer and not with the charge equalizer, the Examiner disagrees. These terms are interchangeable in the art. The end result is that the charges of the batteries are all balanced.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
